

# Ensure accurate immunization data

## Immunization Information System Solution

### Automate immunization processes

Immunizations and public health screenings are necessary tools to reduce the occurrence of infectious disease. Accurate information is needed to drive effective public health programs and ensure the entire population gets the preventive care needed.

Gainwell Technologies is a leading provider of immunization solutions that bring real-time immunization information to the point of care. We have a 25-year track record of empowering public health organizations to leverage innovative technology and services to drive better outcomes.

Gainwell's Immunization Information System (IIS) Solution is a secure, scalable solution that allows you to effectively manage and automate processes to improve your immunization program. Its robust analytics capabilities help you transform your data into the insights you need for effective decision making.

Our IIS solution has five core functional areas:

- **Population Management:** Ensures accurate information for the management of populations
- **Vaccine Inventory Management and Accountability:** Enables tracking and ordering doses for the Vaccines for Children (VFC) population, managing and distributing doses, and ensuring the accountability reporting required at the state and federal levels
- **Immunization Forecasting:** Provides clinical decision support to inform clinicians of what immunizations are due and the recommended doses for patients
- **Data Exchange:** Provides real-time data exchange and interactions with electronic medical record systems, hospital systems, etc. to provide a consolidated immunization record
- **Coverage Reports:** Delivers reporting capabilities at the patient, organization, zip code, county and state level to accurately outline coverage rates for vaccine-preventable diseases

### Benefits

- Bring real-time immunization information to the point of care
- Make informed decisions to improve immunization rates
- Minimize costs and increase the effectiveness of public healthcare management and delivery

# 1.3B

# 120M

Patients covered

Gainwell's Immunization Information System Solution is designed to help you ensure accurate immunization data, increase physician adoption, raise overall immunization rates and improve public health outcomes within the communities you serve.

We can create a solution to meet your state-specific policy needs, and provide services in implementation, operation, and user support and training.

### Gainwell's IIS Solution value

Our solution is designed to have the flexibility you require for effective and more accurate tracking and administration of immunizations. With the IIS, you can:

- Bring real-time immunization information to the point of care
- Provide a consolidated, centralized view of immunization records at the patient level
- Reduce administrative costs with an application that enables instantaneous distribution of application, form and tracking schedule changes to an entire user community
- Use population and immunization information exchanges to meet greater public health needs, including responsiveness and preparedness through Strategic National Stockpile (SNS) and Countermeasure and Response Administration (CRA) requirements
- Leverage immunization visits for other health screenings, such as testing lead levels in blood
- Maximize ROI for the investments you make on education and training

Our extensive immunization expertise and knowledge of national IIS standards give you proven development and project management practices for implementation, operation and enhancement activities. And our consulting services can help keep your immunization program moving forward. We perform an analysis and then create a solution to meet your state-specific policy needs.
